

A taste of the future.
AJINOMOTO®

This report is printed on Forest Thinning Support Paper manufactured by Morino Chonai-kai (Forest Neighborhood Association) in cooperation with the Office Chonai-kai, an environmental NPO that recycles paper. Thinning materials were obtained in Iwazumi-cho, Iwate Prefecture, a municipality that carries out efforts for the revitalization of forests.

This report is printed on Forestry Stewardship Council (FSC) certified paper, which is made from trees grown in responsibly managed forests.

Vegetable-based ink derived from soybean oil was used in the printing of this publication in order to reduce the emission of volatile organic compounds (VOCs), a cause of air pollution.

The printing method used does not generate any harmful wastewater.
