1. Qualitative Information on the Three-month Consolidated Results

Upon the adoption of IFRS, the Ajinomoto Group has introduced "business profit" as a new profit level that will better enable investors, the Board of Directors, and the Management Committee to grasp the core business results and future outlook of each business while also facilitating continual evaluation of the Group's business portfolio by the Board of Directors and the Management Committee. "Business profit" is defined as sales and share of profit of associates and joint ventures minus cost of sales, selling expenses, research and development expenses, and general and administrative expenses. Business profit does not include other operating income or other operating expenses.

(1) Overview of Operating Results

In the three months ended June 30, 2023, the Company's consolidated sales increased 5.6% year-on-year, or ¥17.9 billion, to ¥339.5 billion. This was due to increases in sales in the Seasonings and Foods segment and the Frozen Foods segment due to increases in unit sales prices, the effect of currency translation, and other factors, despite a decrease in sales in the Healthcare and Others segment owing to the impact of lower sales of electronic materials and other factors. Business profit increased 5.7% year-on-year, or ¥2.3 billion, to ¥42.8 billion primarily due to the increases in sales in the Seasonings and Foods segment and the Frozen Foods segment, despite the impact of lower sales in the Healthcare and Others segment, cost increases in raw materials, and other factors. Profit attributable to owners of the parent company totaled ¥27.2 billion, down 1.9% year-on-year, or ¥0.5 billion, as a result of lower other operating income recorded compared with the same period of the previous fiscal year and other factors.

The Company has not revised the financial results forecast announced on May 11, 2023.
