

Clarifying
the Benefits to
Living Beings

Evaluation of digestion and absorption

Benefits

The performance of enteric products
manufactured for particular purposes can be evaluated
quickly and accurately.

The gastrointestinal behaviors
of enteric products can be estimated

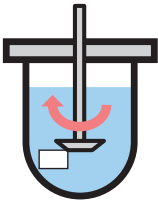

Prototypes of enteric products
can be efficiently screened

Valuable data for proposing the prescription
of enteric products can be provided

Contribution to acceleration and cost-down
of the development of enteric products is expected

Our Technology

Enteric products for animal feeds
to meet particular characteristics

Evaluation of performance using the *in vitro* evaluation system
that simulates the digestive tracts of ruminants

Evaluation of
screened products

Improvement of
the *in vitro* evaluation system

Efficacy check in the ruminant livestock
