

Cosmetics formulation

Benefits

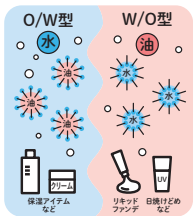

With expertized formulation technology of amino acid derivatives, we support development of products with unique and attractive texture or appearance suitable for various application, such as, transparency, gel, crystals and emulsions.

- Detergency and foamability control
- Texture control
- Rheology control
- Moisture control

Our Technology

Formulation and application technology with amino acid derivatives

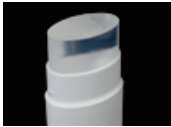

Amino acid derivatives for personal care products

- AMISOFT®
- AMILITE®
- AMIHOPE®
- AMISAFE®
- AJIDEW®
- PRODEW®
- CAE®
- Oil gelator

Product design for various types of applications; transparent, gelatinized, crystalized, emulsified, etc

Prototype formulation database

We are able to support development of mild-to-skin and environmentally friendly products with unique functions
