Sustainability Bond Reporting

Annual disclosure of fund appropriation reporting and impact reporting will be made until the maturity date of this Sustainability Bond.

Fund Appropriation Status Reporting (March 31, 2026)

Materiality	Target Project	Amount to be appropriated (Billions of yen)	Amount appropriated through the end of March 2026 (Billions of yen)
Contribution to solve food and health issues	Acquisition of shares in Nualtra Ltd. (Ireland)	4.3	4.3
Climate Change Adaptation and Mitigation	Introduction of biomass cogeneration facilities at the Kamphaeng Phet Plant of AJINOMOTO CO., (THAILAND) LTD.	5.0	5.0
Climate Change Adaptation and Mitigation	Investment in Tsubame BHB Co., Ltd. (on-site ammonia production technology R&D)	0.7	0.7
	Total	10.0	10.0

Impact Reporting (March 31, 2026)

Target Project	Output (Project progress and results)	Outcome (Effects associated with resolving issues)	Impact (Effects from outcomes)
Acquisition of shares in Nualtra Ltd. (Ireland)	Nualtra launched the oral nutritional supplement Altrapro in the UK and Ireland. The product is a protein supplement containing approximately 20 g of protein per 60 mL, based on the concept of “Low Volume, High Protein.” It is intended to supplement dietary intake for patients who are malnourished or at risk of malnutrition.	The introduction of Altrapro provides patients who have difficulty eating due to factors such as postoperative conditions or aging with an option to consume a high amount of protein in a small volume.	・In addition to the existing ONS line mainly targeting adults and the elderly, we have launched new nutritional support for pediatric patients. This project contributes to reducing child malnutrition, narrowing health disparities, and improving the sustainability of local healthcare systems. ・Early nutritional intervention supports long-term health outcomes, preventive healthcare, and the reduction of medical and social costs.
Introduction of biomass cogeneration facilities at the Kamphaeng Phet Plant of AJINOMOTO CO., (THAILAND) LTD.	・The biomass cogeneration facility has been in continuous operation since its installation in FY22, contributing to the reduction of greenhouse gas emissions.	[FY25 Results (vs. FY18)] - Purchased electricity : approximately 42% reduction - Oil : 100% reduction →GHG 51%(47,654t/y) reduction	・Reducing greenhouse gas emissions that contribute to climate change mitigation [FY2024 achievements: Reduce by 43% (vs. FY2018)] [FY2025 achievements: Reduce by 49% (vs. FY2018)] [FY2030: Reduce by 50% (vs. FY2018)] (TTL in Scope 1&2)
Investment in Tsubame BHB Co., Ltd. (on site ammonia production technology R&D)	・Considering introductions of on-site ammonia production equipment ・In August 2024, Tsubame BHB received an order to construct its second small-scale ammonia production plant for a domestic company. The company is also in negotiations with a potential customer as part of its efforts to expand its business overseas.	・Stable procurement and supply of ammonia through local production for local consumption (it depends on hydrogen as raw material how much greenhouse gas can be reduced)	・Reducing greenhouse gas emissions that contribute to climate change mitigation [FY2024 achievements: Reduce by 43% (vs. FY2018)] [FY2025 achievements: Reduce by 49% (vs. FY2018)] [FY2030: Reduce by 50% (vs. FY2018)] (TTL in Scope 1&2)
